

# O is for...

## OFF BY ONE

In the following puzzle I have taken groups of related words and altered their components in a specific way: in each word I have changed one letter and then scrambled all of the letters to create a new word. For example, the group of words: NORTH, SOUTH, EAST, WEST might get altered to HONOR, THUGS, STAY, PETS. Several such altered sets of words are scattered throughout the grid below. If you can determine the original groups, you will be a long way toward locating the O-piece.
