

## Puzzle 2: Colorful Music (3:00 PM deadline)

Your challenge is to think of as many song titles that have the names of colors\* in them. You may list up to 25 songs; but a particular color may only appear once throughout all song titles (especially relevant if some of your titles use multiple colors). You must also correctly attribute the song to an artist to get credit. Your score for each song in this puzzle will be:

$$(40 - \text{POS}) \times 3$$

where POS is the peak position reached by the song in *The Billboard Book of Top 40 Hits, 9th Edition* (you do not have access to this book during the puzzle... I will use it for grading after you submit your answers). The sum of all your scores will be the total Points earned for this puzzle. You must submit your answer for grading by 3:00 PM. You may only submit an answer once for this puzzle.

\* A "color" must be described as such somewhere in the word's definition of Merriam Webster's Unabridged (3rd ed.) I have a copy of this dictionary on my computer which I will use for reference, but you may *not* ask me if a particular word can be considered a color while solving the puzzle..
